*Fruit Fly Exclusion System trial at Qld DPI&F located at Nambour, Queensland..*

NetPro Pty Ltd is a Queensland based company, specialising in the design and construction of Protective Canopy Systems. The company has been established for well over a decade and has designed many specialized structures to suit customer requirements. These include hail protection, permanent bird protection, various shade structures and permanent vineyard structures.

Beside the initial purpose (as above), protective canopies have additional benefits such as:

- ◆ Reduced evaporation & transpiration
- ◆ Reduced sunburn and wind damage
- ◆ Improved yields and quality
- ◆ Conservation of native wildlife; and
- ◆ Potential for organic production.

A number of attributes set NetPro apart:

- ⚙️ Extensive research and development at our head-quarters in Stanthorpe, Qld;
- ⚙️ Our one-on-one engagement with the client to understand what is required and to create a user-friendly structure;
- ⚙️ Our extensive expertise in the field; and
- ⚙️ Pride in our workmanship (3-year guarantee).

NetPro's success has come from extensive research and development at its testing facility located at Stanthorpe, South Queensland. Currently under trial is a system to be utilised for both hail netting and waterproofing membranes. Also in development is a fruit fly exclusion system used to reduce or prevent the need for pesticides thereby achieving organic production.

Horticulture is not the only industry to benefit from protective canopies - NetPro

*Coloured netting for trees & vegetables.*

has been involved in the development of technology in a number of growth industries. Shade structures have been developed for aquaculture, intensive livestock feedlots, worm farms, plant nurseries, vehicle yards, schools, kindergartens and domestic use. Our technology also has applications for windbreaks; and dam-covers to reduce evaporation have also been developed and installed by NetPro.

Please call or email for more information, or to talk to our consultants for an obligation-free quote.
