NetPro Pty Ltd specialises in the design and construction of Protective Canopy Systems. Twenty years ago, the founding directors emigrated to Australia from New Zealand and established the company. **Netpro** works with a number of agents and contractors throughout New Zealand. We have designed many specialized structures to suit customer requirements. These include hail protection, permanent bird or wind protection, and shade structures.

Permanent protection over 17Ha kiwi-fruit orchard in Hastings.

Protective canopies have numerous **proven benefits and effects**, such as:

- ◆ Microclimate modification
- ◆ Reduced evaporation & transpiration
- ◆ Reduced wind damage & sunburn
- ◆ Improved yields and quality; and
- ◆ Potential for organic production.

Coloured net over apples and trellised pears.

NetPro's service philosophy proudly delivers:

- ⚙ One-on-one engagement with the client to understand what is required and to design a structure to suit individual customer needs;
- ⚙ Extensive research and development;
- ⚙ Staff field knowledge and expertise;
- ⚙ Pride in our workmanship (1-year warranty) and products (up to 10-year pro-rata guarantee on nets).

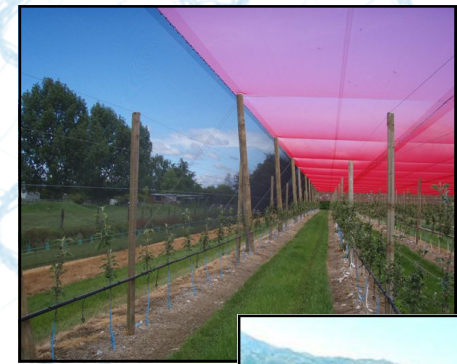

Above: Kiwi-fruit site soon after canopy installation;
Below: same site, 1 year later.

Under Kiwi-fruit vines (grown under net)

Canopy Wind-deflection.

Left: Heavy black side-cloth to reduce spray-drift.

Right: Birdnetting over Cherries.

Horticulture is not the only industry to benefit from protective canopies. **NetPro** has been involved in the development of technology in a number of growth industries developing various protective structures for aquaculture, intensive livestock feedlots, worm farms, plant nurseries, vehicle yards, schools, kindergartens and domestic use - these include overhead structures windbreaks and dam-covers.

Internal Windbreaks for kiwifruit.
