Shade Structures

Dam Covers

Windbreaks

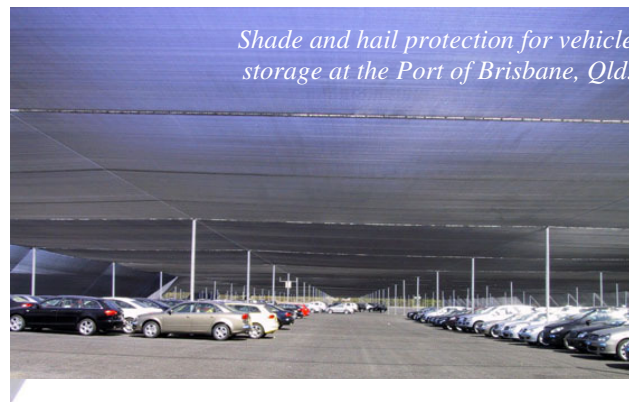

Our close engagement with the intensive livestock industry has led NetPro to develop our unique canopy material, which is designed to reduce pooling of rain and consequent pen floor damage. Our feedlot designs aim to facilitate pen maintenance whilst improving welfare and performance.

NetPro Pty Ltd is an Australian company, specialising in the design and construction of Protective Canopy Systems. Since establishment in 1991, the company has constructed many specialized canopies to suit customer requirements. Our structures range from horticultural protection to evaporation covers and windbreaks, to shade structures of industrial proportions.

Dam Covers

... low profile structure means reduced wind load.

Shade and hail protection for vehicle storage at the Port of Brisbane, Qld.
