Netting — Ideal for Fruit-fly Exclusion

Netting advantages:

- Reusable
- Organic and environmentally friendly
- Excludes pests such as birds, snails and insects—including moths, grasshoppers, fruit-fly etc
- Provides some protection from sun and wind
- Breathes (i.e. plants don't sweat)
- Creates a nurturing microclimate, retaining moisture and warmth

A Versatile Product:

Netting can be used in a variety of ways:

- Throw-over—lightly resting on plants (rows, trellis, garden-bed, trees)
- A small structure for each bed or tree
- An exclusion structure from the size of a greenhouse up to an entire orchard enclosure.

See illustrations to the right.

Versatility:

- **Throw-over**
- **Small Structures**
- **Large enclosures**

Promotion: Gro-Shield and Frost Cloth

Introducing our newest products - ideally suited to home gardeners and commercial gardeners alike. Gro-Shield and Frost Cloth are spun-bonded tissue-like products, ideal for providing short-term gentle protection against temperature extremes. Gro-Shield and Frost Cloth allow sufficient light and air to reach the plants whilst protecting them from predators and temperature extremes. Horticultural benefits include: earlier planting and harvesting; reduce sprays; reduce soil moisture loss. Please refer to our other Brochures and Product Sheets for more details, or call us directly .
