Net Information	Points to be aware of:
<p><u>Shrinkback factor:</u> We sell the net in "tagged metres", which are longer than actual lineal metres (as laid out on the ground). This is because, when stretched to its proper width, the length will pull back to the correct "hung" length and width. DO NOT lay the net on the ground to measure and cut until it has been stretched out to the required width.</p> <p><u>Stretch Capabilities:</u> It requires specialised equipment to pull the net out to the stated widths. We don't expect that persons erecting net with standard tools and equipment will be able to pull it out to these widths. THEREFORE, we always recommend that you allow, and purchase, extra width or the next size up to your requirements.</p>
